

Competition Tanning Prep Instructions

It is important to properly prepare your skin to be tanned. This will insure an even and streak-free tan.

- Starting 6 days before your show start exfoliating your skin daily (*ex. if your show is on Saturday, start exfoliating the Sunday before*)
- Moisturize skin thoroughly immediately after exfoliating (It's very important not to skip this step)
- The morning of your tanning **DO NOT MOISTURIZE**

What to wear

Wear loose fitting clothing and flip-flops to your appointment.

You can tan nude or you can wear a bathing suit similar to your contest suit to avoid tan lines

- ✓ **It is very important for your tan to dry between applications (at least 3 hours) - so schedule your second application accordingly**

Wear loose silk-like pajamas to sleep in

Do not get tanned skin wet

Do not use exfoliates or moisturizers that contain perfumes. They may react with the tanning agent

The active ingredient in Jan Tana products is dihydroxyacetone (DHA). DHA is not a dye and washes completely out of clothing. DHA interacts with the amino acids in dead skin cells to produce a brown color change. DHA is approved by the FDA, it is not absorbed through the skin and has no known toxicity
